of this variety.

O & M ENSILAGE CORN

O & M HY-CROSS T-13

Originated by the O & M Seed Co. Grows stalks of 12 to 16 feet high, big ears of 12 to 14 rows of broad white grain and a red cob. Matures in 110 to 115 days. One of the best silage corns we have ever produced.

O & M YELLOW SWEEPSTAKES

A large ensilage corn. Grows a stalk 12 to 14 feet high and a big ear 10 to 12 inches long with 12 to 14 rows of broad yellow grains. Matures in about 120 days. One of the best ensilage varieties.

HOME OF O & M NORTHERN GROWN SEED

OHIO'S LARGEST and MOST MODERN SEED CORN DRYING and GRADING PLANT

O & M HYBRID CORN

IOWA 939 HYBRID

One of the oldest and most popular Hybrids grown. Matures in 100 days. Its past performance has proven this Hybrid to be one of the best.

W-17 HYBRID

High yielding. Pure yellow. Same maturity as 939.

OHIO K-23 HYBRID

One of Ohio's best 90-day Hybrids. It is very drouth and wind resistant, and grows a stalk 7 feet tall. The ears are medium in size, tapering, with 16 to 18 rows.

OHIO K-35 HYBRID

Early. Very productive. 14 to 18 rows. Medium dented.

O-39 HYBRID

Developed by the O & M Seed Co. This corn produces large sound beautiful golden color, deep grain ears of 16 to 18 rows, with strong stalks about eight feet tall. The ears are medium in size with a very small cob, and will shell more corn to the bushel than other leading hybrids. Highly recommended for a medium early, high yielding Hybrid.

KNOWN FOR YEARS

THE EXCELLENT QUALITY OF

O & M Northern Grown Seed Oats

O & M SEED OATS

Of known quality, can be sown one-half bushel per acre less than common seed oats, which results in a reduced cost. They produce strong, healthy, vigorous plants that stool heavily and result in a larger crop of big heavy grain, thin shuck and stiff straw that seldom lodge. They are a very consistent heavy yielder.

O & M VICTORY SEED OATS

We highly recommend these oats. A rather tall growing variety with very strong, stiff straw. The grain is white, long, very plump and heavy, very handsome in appearance, medium to rather late in maturity. One of the heaviest yielding oats ever to be introduced into this country.

O & M WHITE STAR SEED OATS

We imported the parent stock direct from Sweden, which has proven to be one of the best we have ever produced. It is a white, branching type oat, quite similar to Victory, but with a slightly shorter straw and a very strong root system. The kernels are large and plump, with a fairly thin hull, containing heavy meat.

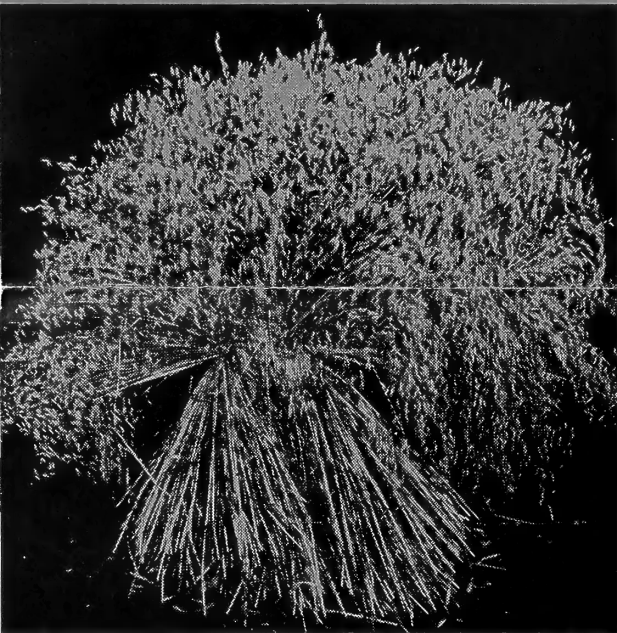

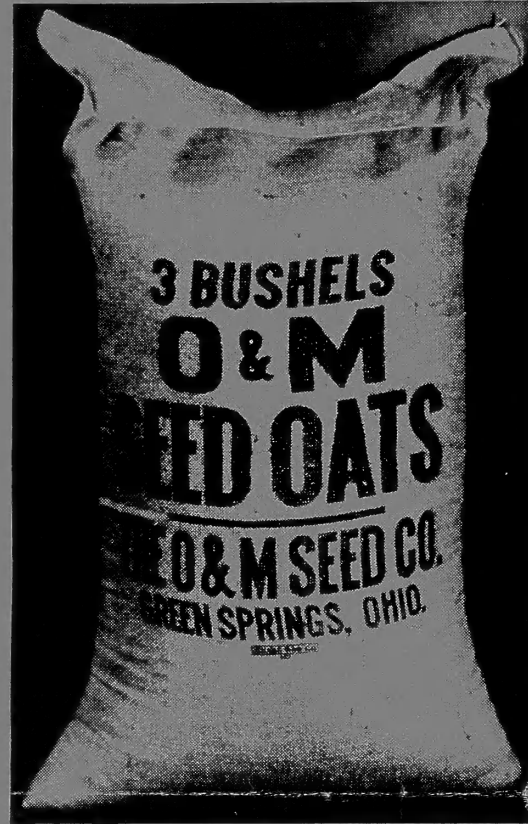

A mid-season variety, at least three or four days earlier than Victory.

O & M COLUMBIA GREY OATS

A high yielding early maturing oat developed at the Missouri Agriculture Experiment Station. In tests over a six year period at the Ohio State University it has proved both earlier and higher yielding than Fulghum or Franklin. Kernels are grayish in color, long berry and thin hull. A high yielding variety for warm climates.

O & M LENROC OATS

Introduced by Cornell University Agriculture Experiment Station. It is of the tree or branching type and has a good stiff straw. The kernels are white, plump with a medium hull. Lenroc is about mid-season in maturity. It will ripen about a week earlier than Victory or other similar types. It has a very high yield record.

You Can't Substitute For Quality
